

Turku ABC coaching

Turku Women's Center and Turku City Library

Turku ABC coaching provides for students an unique opportunity to develop their language skills while deepening in Finnish culture.

Turku ABC coaching does not replace but complements other language and integration training.

More than 2,000 Ukrainian language students have already attracted online coaching and Forward learning environment. Together with them, we are constantly developing activities to better meet the needs of students.

Turku ABC content consists of a variety of exercises and teaching forms that support effective learning.

Zoom episodes provide intense teaching every month, allowing both primary education and teaching for more advanced students. Teaching includes exercises to help you study Finnish culture.

In addition, the Facebook group has a new teaching task every day.

The teaching emphasizes voluntary, regular and active study and purposefulness. We encourage students to create routines and recommend studying daily. The ABC -TYKY site offers high quality study materials that are constantly updated.

Together with teachers, volunteers and students, we are developing new and effective ways to practice practical language skills online. Based on our belief and feedback, we know that coaching is a good and flexible alternative to learning the Finnish language, but also in addition to work or study.

In Turku ABC coaching, we want to support each student so that each student finds their own way actively and independently developing their language skills.

In particular, we want to share information about the city of Turku and living in Turku, told by the residents of the city.

We invite you to learn Finnish and visit Turku, our Ukrainian friend!
